ABOUT ME

Hi, my name is Casper Bengtsson and I'm a game programmer. I started making games in my free time when I was 15 years old, and since then I have never stopped learning and improving my skills.

I specialize in gameplay and tools programming, using languages such as C++ and C#. I enjoy working on both the logic and the aesthetics of games, and I always strive to deliver high-quality code that is efficient and easy to maintain.

EDUCATION

2021 - 2024, Game Programming

The Game Assembly, Malmö

8 Group game projects | Full-time C++ courses | Created a DX11 engine from scratch | Agile working with scrum

2018 - 2021, Game Development

LBS, Halmstad
